PROFILE

B.Tech Computer Engineering student (Expected 2027) with hands-on experience shipping production-grade applications across Flutter Mobile, Full-Stack Web (React / Next.js / Node.js), Java Engineering, and Salesforce CRM. Built a complete AI-powered farmer assistance app integrating Gemini & Claude APIs, Firebase, and offline SQLite sync. Eager to contribute real skills in a challenging internship environment.

PROJECTS

Krushni Mitra — AI-Powered Farmer Assistance App

Flutter Firebase Riverpod Gemini API Claude API SQLite OpenWeatherMap

- Architected a full production Flutter app with 11 features: AI Crop Doctor, Chatbot, Live Mandi Prices, Weather, Soil Advisor, Govt. Schemes, Crop Calendar, Farm Diary, Input Calculator and Community.
- Built "Farmer DNA" — personalised AI context system; Gemini multi-key load balancing with Claude as fallback; Firebase OTP auth + real-time Firestore-to-SQLite offline sync.
- Full trilingual support (Hindi, Marathi, English) with custom design system (green #1B5E20, gold #F9A825, Poppins).
- Final-year B.Tech project under Prof. P. A. Patil, KBSCOE&T Jalgaon (DBATU).

CrazyXAni — Anime Streaming Platform

Next.js React Node.js MongoDB Anilist API

- Full-stack SSR streaming platform with Anilist API aggregation, search, and MongoDB-persisted watchlist.
- SEO-optimised via Next.js SSR; RESTful backend with real-time API calls and user session management.

Inventory Management REST API

Node.js Express MySQL JWT Postman

- Secure full-CRUD REST API with JWT role-based auth and normalised MySQL schema; all endpoints tested via Postman collections.

Java OOP Console Application

Java OOP Collections Exception Handling

- Clean implementation of encapsulation, inheritance and polymorphism; ArrayList, HashMap and robust exception handling for maintainable code.
